

Index to Volume 118

Adhikary G, *see* Chandra S *et al.*

Alemaný M, *see* Esteve M *et al.*

Arino T, *see* Iwai T *et al.*

Basu MK, *see* Chattopadhyay A *et al.*

Bhat UR, *see* Sangadala S *et al.*

Birnboim HC, *see* Martins EAL *et al.*

Brünig H, *see* Lenzen S *et al.*

Cantrill RC, *see* de Antueno RJ *et al.*

Caulfield JB, Norton P and Weaver RD: Cardiac dilation associated with collagen alterations 171

Chandra S, Adhikary G, Sikdar R and Sen PC: The *in vivo* inhibition of transport enzyme activities by chloroquine in different organs of rat is reversible 15

Chattopadhyay A, Choudhury TD, Basu MK and Datta AG: Effect of Cu²⁺-ascorbic acid on lipid peroxidation, Mg²⁺-ATPase activity and spectrin of RBC membrane and reversal by erythropoietin 23

Choudhury TD, *see* Chattopadhyay A *et al.*

Coumans WA, *see* de Groot MJM *et al.*

Datta AG, *see* Chattopadhyay A *et al.*

Datta J and Samanta TB: Characterization of a novel microsomal glutathione S-transferase produced by *Aspergillus ochraceus* TS 31

de Antueno RJ, Cantrill RC, Huang Y-S, Raha SK, Elliot M and Horrobin DF: Effect of n-3 and n-6 fatty acids on hepatic microsomal lipid metabolism: a time course study 153

de Groot MJM, Coumans WA and van der Vusse GJ: The nucleotide metabolism in lactate perfused hearts under ischaemic and reperfused conditions 1

Denial T, *see* Marx KA

Elliot M, *see* de Antueno RJ *et al.*

Esteve M, Rafecas I, Fernández-López JA, Remesar X and Alemany M: Fatty acid utilization by young Wistar rats fed a cafeteria diet 67

Fernández-López JA, *see* Esteve M *et al.*

Fernández-Renart M, *see* Ospina B *et al.*

Gross SK, Lyerla TA, Williams MA and McCluer RH: The accumulation and metabolism of glycosphingolipids in primary kidney cell cultures from beige mice 61

Hollenberg MD, *see* Zhao D *et al.*

Horrobin DF, *see* de Antueno RJ *et al.*

Huang Y-S, *see* de Antueno RJ *et al.*

Iwai T, Takeda N, Tuchiya M, Arino T, Tanamura A and Nagano M: Effects of regression of cardiac hypertrophy on myocardial contractility and ventricular myosin isoenzymes 99

- Kapaniris O, *see* Roediger WEW *et al.*
- Katai H, Stephenson JD, Simkevich CP, Thompson JP and Raghow R: An AP-1-like motif in the first intron of human Pro α 1(I) collagen gene is a critical determinant of its transcriptional activity 119
- Kirkeeide E-K, Pryme IF and Vedeler A: Morphological changes in Krebs II ascites tumour cells induced by insulin are associated with differences in protein composition and altered amounts of free, cytoskeletal-bound and membrane-bound polysomes 131
- Lenzen S, Brünig H and Münster W: Effects of alloxan and ninhydrin on mitochondrial Ca²⁺ transport 141
- Li SS-L, *see* Miyasaka H *et al.*
- Lyerla TA, *see* Gross SK *et al.*
- Madhubala R and Pegg AE: Inhibition of ornithine decarboxylase and S-adenosylmethionine decarboxylase synthesis by antisense oligodeoxynucleotides 191
- Mak IT, *see* Weglicki WB
- Martins EAL, Mori L, Birnboim HC and Meneghini R: Menadione-resistant Chinese hamster cell variants are cross-resistant to hydrogen peroxide and exhibit stable chromosomal and biochemical alterations 181
- Marx KA and Denial T: High affinity DNA-microtubule interactions: evidence for a conserved DNA-MAP interaction involving unusual high CsCl density repetitious DNA families 39
- McCluer RH, *see* Gross SK *et al.*
- Mendicino J, *see* Sangadala S *et al.*
- Meneghini R, *see* Martins EAL *et al.*
- Millard S, *see* Roediger WEW *et al.*
- Miyasaka H and Li SS-L: Molecular cloning, nucleotide sequence and expression of a cDNA encoding an intracellular protein tyrosine phosphatase, PTPase-2, from mouse testis and T-cells 91
- Mori L, *see* Martins EAL *et al.*
- Münster W, *see* Lenzen S *et al.*
- Nagano M, *see* Iwai T *et al.*
- Norton P, *see* Caulfield JB *et al.*
- Núñez A, *see* Ospina B *et al.*
- Ospina B, Núñez A and Fernández-Renart M: Purification of a soluble casein kinase II from *Dictyostelium discoideum* lacking the β subunit: regulation during proliferation and differentiation 49
- Pegg AE, *see* Madhubala R
- Pryme IF, *see* Kirkeeide E-K *et al.*
- Rafecas I, *see* Esteve M *et al.*
- Raghow R, *see* Katai H *et al.*
- Raha SK, *see* de Antueno RJ *et al.*
- Remesar X, *see* Esteve M *et al.*
- Roediger WEW, Kapaniris O and Millard S: Lipogenesis from n-butyrate in colonocytes. Action of reducing agent and 5-aminosalicylic acid with relevance to ulcerative colitis 113
- Samanta TB, *see* Datta J
- Sangadala S, Bhat UR and Mendicino J: Quantitation and structures of oligosaccharide chains in human trachea mucin glycoproteins 75
- Sen PC, *see* Chandra S *et al.*
- Severson DL, *see* Zhao D *et al.*
- Sikdar R, *see* Chandra S *et al.*
- Simkevich CP, *see* Katai H *et al.*

Stephenson JD, *see* Katai H *et al.*

Takeda N, *see* Iwai T *et al.*

Tanamura A, *see* Iwai T *et al.*

Thompson JP, *see* Katai H *et al.*

Tuchiya M, *see* Iwai T *et al.*

van der Vusse GJ, *see* de Groot MJM *et al.*

Vedeler A, *see* Kirkeeide E-K *et al.*

Weaver RD, *see* Caulfield JB *et al.*

Weglicki WB and Mak IT: Antioxidant drug mechanisms: transition metal-binding and vasodilation 105

Williams MA, *see* Gross SK *et al.*

Zhao D, Hollenberg MD and Severson DL: Comparison of an endogenous protein kinase C substrate in rat aorta with rat brain MARCKS 163
